

My experience with Dr. Bredenkamp was definitely professional caring and sensitive. He said it won't be easy and that he would see me through the treatment and was there to answer all my fears and concerns. I could not have asked for more than that. The benefit to this – being able to live a full and productive life, however I had to change my eating habits because of my stage 4 tongue cancer and related treatment.

I would definitely refer my family and friends to Dr. B, his office and staff. Dr. B is my hero.... I am cancer free
